DETAILED ACTION

Status of Claims

The examiner notes the decision of the Board of Patent Appeals and Conferences dated 6/11/2008. Claims 2-6, 10, 33-52 been cancelled. Claims 1, 7-9, 11-32, 53-58 are pending and are allowable for the reasons indicated below.

Application Priority

This application claims priority of the provisional application 60/270,047 dated 02/20/2001.

REASONS FOR ALLOWANCE

Applicants' arguments regarding the rejection of claims 1, 7-9, 11-32 and 53-58 are rejected under 35 U.S.C. 103(a) as being unpatentable over Stepniewski et al. (US 5,599,533) in view of Rapaport (US 5,730,991), and further in view of Dorogi et al. (US 5,882,661) and rejection of claims 1, 7-9, 11-32 and 53-58 are rejected under 35 U.S.C. 103(a) as being unpatentable over Stepniewski et al., Rapaport, and Dorogi et al. as applied to claims 1, 7-9, 11-32 and 53-58 above, and further in view of Collin et al. (US 5,656,672) have been fully considered and found to be persuasive. The rejections are withdrawn. Claims 1, 7-9, 11-32 and 53-58 are allowable due to the showing of Applicants' declaration under 37 C.F.R. 1.132 (dated 8/9/2006) that a cetyl dimethicone copolyol concentration that falls on either side of the claimed concentration range produces a result that fails to meet the requirements of the claimed invention.

The claims of the instant invention are directed to a pigmented cosmetic composition comprising a water-in-oil emulsion, said emulsion comprising:

(a) from about 30% to about 40% by weight of an oil phase; (b) from about 30% to about 50% by weight of an aqueous phase; (c) from about 5% to about 15% by weight of a pigment; (d) from about 3 to about 6% by weight of a cetyl dimethicone copolyol emulsifier; and (e) a separation inhibitor comprising a silicone elastomer, wherein the silicone elastomer comprises a dimethicone cross-polymer, and wherein said silicone elastomer is present in an amount of from about 0.1% to about 7% by weight of said composition, wherein the composition is stable for at least three months at about 50 °C.

The closest prior art of record are (1) Stepniewski et al. (US 5,599,533) , (2) Rapaport (US 5,730,991), (3) Dorogi et al. (US 5,882,661), (4) Collin et al. (U.S. 5,656,672). Stepniewski et al. describes the use of a surfactant in the range of about 0.01-20 wt% and Collin teaches cosmetic compositions comprising cetyl dimethicone copolyol in a concentration of from 0.5% to 10%, and preferably from 1% to 6% and provides two examples of cosmetic compositions comprising 3 wt % cetyl dimethicone copolyol. Collin teaches a preparation that is stable for two months at 45 °C (Collin, col. 7, 11. 17-44). Rapaport teaches octyl methoxycinnamate as a preferred sunscreen agent for use in topical compositions and Dorogi et al. teach phenoxyethanol, methyl paraben and propyl paraben as preferred preservatives for use in topical compositions. The claims of the instant invention require from about 3 to about 6% by weight of a cetyl dimethicone copolyol emulsifier and the composition is stable for at least three months at about 50 °C. The declaration provides evidence that "compositions comprising a cetyl dimethicone copolyol emulsifier in an amount *outside* of the claimed range were

not similarly stable" and the fourth Rule 132 Declaration "summarizes the results of the three prior Rule 132 Declarations and describes the amounts of all the ingredients in each formulation" . The fourth Declaration provides data of "[c]omparative Samples A and B comprising about 1 wt% and about 8 wt% cetyl dimethicone copolyol, respectively, were not similarly stable" to compositions comprising cetyl dimethicone copolyol in the range set forth in the claimed invention. Hence the applicant has provided evidence that a cetyl dimethicone copolyol concentration that falls on either side of the claimed concentration range produces a result that fails to meet the requirements of the claimed invention. Collins and other closely related prior art does not teach, disclose or suggest to prepare a composition that is stable for at least three months at about 50 °C by adding 3-6 wt% of a cetyl dimethicone copolyol"

The claims are allowable over the closest art of record because they do not teach, disclose nor make obvious the claimed pigmented cosmetic composition.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
